Giuliano Pascarelli

Full Stack Developer
San Luis, Argentina • giulianopascarelli@gmail.com • +54 2664 857382
Portfolio • LinkedIn • GitHub

Professional Profile

Full Stack Developer with more than 3 years of experience building web applications, with particular strength in Frontend (React, Next.js) and solid foundations in Backend (Java, Node.js, REST APIs). Experienced in leading small development teams, training more than 20 junior developers, and teaching programming courses. Comfortable working with SQL databases, agile methodologies (Scrum/Kanban), and contributing to community-oriented open source projects.

Experience

Backend / Full Stack Developer — SimpleDevsSL (Open Source Initiative)
December 2025 – Present

Collaborative, non-profit initiative that develops open source software solutions for real problems in the community of San Luis, Argentina.

- Collaborate with a small team of developers in the design and development of free software projects focused on addressing real community needs.
- Main contributions include backend development, software architecture, and technical planning, also participating in frontend, infrastructure, and deployment as needed by each project.
- Contributed to the development of Guía Puntana, a web platform that connects local talent and services.

Full Stack Developer / Team Leader — Aptugo, Warwick, United Kingdom (remote from Argentina)
February 2021 – April 2024

I joined Aptugo with an initial knowledge of programming and, through self-directed learning and consistent work, grew into leading a development team as Team Leader while combining development, technical leadership, and training responsibilities in a fast-paced startup environment.

- Developed full stack web applications with the MERN stack (MongoDB, Express, React, Node.js) and responsive interfaces with React, SCSS, and Material UI.
- Designed and integrated REST APIs and maintained NoSQL databases (MongoDB).
- Technically coordinated a team of up to 3 developers as Team Leader and trained more than 20 junior developers with varied levels of previous experience.
- Taught programming courses to external clients about the company's low-code tool, explaining traditional programming fundamentals and their equivalents in low-code concepts.
- Worked with agile methodologies (Scrum and Kanban).

Object-Oriented Programming (OOP) Tutor — Independent
Freelance

Private OOP lessons for students and self-taught developers, applying the experience gained as a tutor and trainer at Aptugo.

Projects

Gym Tracker — React, Vite, Hono, Cloudflare Workers
gym-tracker-frontend.giulianopascarelli.workers.dev

Mobile-first web application for managing gym exercises and workouts. Frontend built with React and Vite, API built with Hono and a SQL database (D1), with full deployment on Cloudflare Workers. Personal project.

Study Plan Manager — React, Node.js, Express
Frontend Repo • *Backend Repo*

Personal full stack application designed to help students organize their study plan and academic schedule. Individual project currently 80% complete.

Juliette's Kitchen Timer — React, Vite
julietteskitchentimer.vercel.app

Lightweight PWA based on the Pomodoro technique, with its own illustrated aesthetic and an animated mascot that accompanies work sessions. Personal project.

Education

Bachelor's Degree in Computer Science (in progress) — Universidad Siglo 21, Córdoba, Argentina
2024 – Present

- Intermediate degree of **Systems Analyst** obtained
  July 2026

Technical Profile

Languages: Java, JavaScript, TypeScript, C
Frontend: React, Next.js, HTML, CSS, SCSS, Material UI
Backend: Node.js, Express, Hono, Java (Spring Boot), REST APIs
Databases: SQL (MySQL), Supabase, MongoDB (basic level)
Tools and methodologies: Git, Docker (personal environment), Cloudflare Workers, Maven, UNIX/Linux, shell scripting, Scrum, Kanban
Soft skills: Technical leadership and team coordination, mentoring and training junior profiles, effective communication and teamwork, self-directed learning, and problem-solving.
Languages: Spanish (Native), English (Advanced – reading, writing, and conversation)
Interests: Open source projects, continuous learning of new technologies, and Linux system customization.
